DRAFT FOR DISCUSSION · PRICING MODEL

TestMate Pricing Plans

Three plans built around what TestMate does today: software testing and quality management, plus IT service management. Start free, grow into the service desk, and move to Enterprise for automation, custom roles and governance.

Version 0.1 draft **Date** 21 October 2026 **Currency** USD, excluding tax

PLANS AT A GLANCE

Free, Standard and Enterprise

Price is per **full seat** per month. Paying annually costs about 20% less. People who only submit requests or tickets never need a paid seat (see page 2).

Free

Small QA teams and startups getting their testing in order.

$0 forever

Up to 5 full seats.
No credit card.

- ✓ 3 projects, 1,000 test cases
- ✓ Suites, cases, test runs and result history
- ✓ Bug tracking and feature requests with voting
- ✓ Spreadsheet import and export
- ✓ Public ticket portal (1 project)
- ✓ Live chat widget with TestMate branding
- ✓ Built-in roles, 30-day activity log
- ✓ AI with your own key, plus 50 trial credits
- ✓ Help centre and docs

MOST POPULAR

Standard

Growing teams running testing and an IT service desk together.

$15 / seat / month

Billed annually, or $19 billed monthly.
Up to 100 full seats.

- ✓ Everything in Free, no project or case limits
- ✓ IT request portal, service catalog, forms and approvals
- ✓ Service queue for IT agents
- ✓ Client companies (up to 10) with two-tier support
- ✓ SLA tracking with your own targets
- ✓ Live chat and WhatsApp widgets, unbranded
- ✓ Escalations and service reports
- ✓ 100 AI credits per seat each month, pooled
- ✓ 1-year activity log · email support (1 business day)

Enterprise

Organisations and service providers that need control, automation and scale.

$29 / seat / month

Starting price, billed annually.
Minimum 25 seats. Custom quotes.

- ✓ Everything in Standard, unlimited seats and client companies
- ✓ Custom roles and permissions, preview as a role
- ✓ Automation rules and safe auto-approval
- ✓ Webhook fulfilment (Power Automate, Logic Apps, n8n)
- ✓ Identity checks, escalations and service reports
- ✓ Provisioning API for client companies
- ✓ AI model choice per feature, 300 credits per seat
- ✓ Unlimited activity log retention
- ✓ Priority support, onboarding and an uptime commitment

The idea in one line: Free covers testing. Standard adds the IT service desk and customer support. Enterprise adds automation, custom access control and governance. Each step up matches a real change in how a team works, not a feature held back for no reason.

HOW BILLING WORKS

Who needs a paid seat

TestMate serves three groups of people: your own team, your customers' IT staff, and everyone else who just asks for help. Only the first two cost money, so it stays cheap to roll the request portal out to a whole company.

Full seat **Plan price**	Your own team: organisation admins, test leads, QA engineers, testers and IT service agents. These are the people who write and run tests, work bugs, configure the catalog and work the service queue.
Support seat **$6 / month**	IT supporters and support leads who belong to a **client company**. They work only their own company's ticket queue (first-tier triage, auto-assignment, escalation) and cannot see your projects. Free plan includes 2. Enterprise gets them at $4.
Free (unlimited) **$0**	Employees who submit IT requests and approve them, read-only project viewers, people outside the organisation who submit tickets on the public portal or follow them in "My tickets", and website visitors using the live chat or WhatsApp widget.

Worked examples (annual billing)

Team	Plan	Calculation	Per month
Startup QA team: 4 testers	Free	Within the 5-seat limit	$0
Software house: 10 QA staff, 2 IT agents, 3 client supporters, 200 employees raising requests	Standard	12 × $15 + 3 × $6 (employees free)	**$198**
Managed service provider: 40 staff, 25 client companies, 60 client supporters	Enterprise	40 × $29 + 60 × $4	**$1,400**

Billing rules

- **Annual or monthly.** Annual prices are about 20% lower. Monthly plans can be cancelled at any time.
- **Seats are counted at each bill.** Adding someone mid-term is charged pro rata. Removing someone takes effect at the next renewal.
- **14-day Standard trial** for every new organisation, with no card. When it ends the workspace drops to Free; nothing is deleted, but anything over Free's limits becomes read-only.
- **Discounts**: 30% for registered non-profits and education, 50% for early-stage startups in their first year (optional programme).

FULL COMPARISON

What's included in each plan

Every row is a feature that exists in the app today unless it's marked ROADMAP.

Feature	Free	Standard	Enterprise
LIMITS			
Full seats	5	100	Unlimited
Projects	3	Unlimited	Unlimited
Test cases	1,000	Unlimited	Unlimited
Attachment storage (screenshots on cases and tickets)	1 GB	10 GB per seat, pooled	Custom
Client companies	1	10	Unlimited
TESTING & QUALITY			
Projects, test suites and test cases with steps, tags and expected results	✓	✓	✓
Test runs with pass / fail / blocked / skipped results and full history	✓	✓	✓
Bulk import from the spreadsheet template, export a project or suite	✓	✓	✓
Bug tracking with separate severity and priority, and reference codes	✓	✓	✓
Feature requests with voting	✓	✓	✓
Realtime comments and presence	✓	✓	✓
Dashboard and global search	✓	✓	✓
CUSTOMER SUPPORT			
Public ticket portal with codes, status and email updates	1 project	✓	✓
Live chat widget for your website	Branded	✓	✓
WhatsApp widget	—	✓	✓
Client-company support desk: first-tier triage, least-busy auto-assignment, escalation	1 company	✓	✓
SLA tracking by severity (first response and resolution)	Default targets	Custom targets	Custom targets
Linking tickets to bugs and feature requests	✓	✓	✓
Provisioning API to create client companies from your own sign-up flow	—	—	✓

IT SERVICE MANAGEMENT			
Request portal, "My requests" and service catalog with custom forms	—	✓	✓
Approvals and approval setup	—	Single step	Multi-step
Service queue for IT agents, internal notes and conversations	—	✓	✓
Escalations	—	✓	✓
Service reports	—	Standard reports	Full reports
Automation rules (set priority, assign, flag for review, add a note)	—	—	✓
Auto-approval for low-risk items, with a full audit trail	—	—	✓
Webhook fulfilment connectors with signed payloads and retries	—	—	✓
Self-service deflection links	—	✓	✓
Identity checks before sensitive requests (such as password resets)	—	—	✓
AI ASSISTANCE			
AI drafts for bug reports and feature requests	✓	✓	✓
AI request intake (suggests the catalog item and fills the form) and AI triage advice	—	✓	✓
Bring your own AI key (never uses credits)	✓	✓	✓
AI credits included on the organisation's key	50 one-time	100 / seat / month	300 / seat / month
Choose the AI model for each feature, set credit prices, view usage log	—	Usage log	✓
ACCESS, SECURITY & ADMINISTRATION			
Email and password sign-in with email verification, Google sign-in	✓	✓	✓
Built-in roles (admin, test lead, QA engineer, tester, IT agent, employee, support lead)	✓	✓	✓
Project roles (team lead, member, viewer)	✓	✓	✓
Custom roles built from the permission catalog	—	—	✓
Preview the app as a lower role	—	—	✓
Activity log retention	30 days	1 year	Unlimited
Installable app (PWA) on desktop and mobile, light and dark themes	✓	✓	✓
SAML single sign-on and SCIM user provisioning ROADMAP	—	—	✓
Choice of data region ROADMAP	—	—	✓

SUPPORT & SERVICE			
Help centre and documentation	✓	✓	✓
Email support	—	1 business day	4-hour priority
Guided onboarding and data migration help	Product tour	Product tour	Named contact
Uptime commitment	—	—	99.9%
Invoice billing and purchase orders	—	—	✓

ADD-ONS

Extras you can buy

Add-on	Price	Notes
AI credit pack: 1,000 credits	$10	Credits don't expire while the subscription is active. Also on Free.
AI credit pack: 10,000 credits	$80	Admins share credits out to users from the credits page.
Extra client companies (Standard)	$25 / month per 5	Or move to Enterprise for unlimited.
Extra storage	$10 / month per 100 GB	For heavy screenshot use on cases and tickets.
Onboarding and migration package	From $1,500 one-off	Import existing test suites and ticket history, catalog setup, and admin training.

RATIONALE

Why the plans are split this way

These lines come from how the app is built, so each plan can be switched on with existing permissions rather than new code paths.

Free: let testing teams start

The core loop (project → suite → case → run → bug) is what gets a team to adopt TestMate. Keeping it free removes the reason not to try it. The 5-seat and 3-project limits are generous for a small team, and they bite as soon as a company grows, which is when it can afford to pay.

Standard: the service desk is the upgrade

The IT request portal, catalog, approvals and service queue are a second product, and the landing page sells TestMate as "testing *and* IT services". Putting them in Standard gives a clear reason to upgrade. Because requesters are free, one paid IT agent can serve a whole company.

Enterprise: control and automation

Custom roles, automation rules, auto-approval, webhook connectors, identity checks and the provisioning API matter to larger organisations and managed service providers. They also carry the most risk if misconfigured, so they belong on the plan that comes with priority support and onboarding.

AI: credits protect margin

The app already meters AI with credits, charges only when the organisation's key is used, and refunds failed calls. Including a monthly allowance makes AI feel part of the plan. Credit packs cover heavy users. Bring-your-own-key stays free on every plan, so cost-sensitive customers aren't blocked.

What it costs us to serve a customer

Cost driver	Where it comes from	How the plans cover it
Compute and database	Cloud Run API and PostgreSQL	Seat price. Free limits keep idle workspaces small.
Image storage	Cloudinary attachments (up to 10 × 5 MB per upload)	Storage allowance per plan, plus the storage add-on.
Email	Verification codes, ticket updates, approvals, notifications	Seat price. Ticket emails grow with use, which tracks paid features.
AI model calls	Bug and feature drafts, request intake and triage	Credits, priced per feature by admins, with packs for heavy use.
Support time	Onboarding, catalog setup, connector debugging	Response times by plan; paid onboarding package.

When a customer should upgrade

- **Free → Standard:** a 6th teammate, a 4th project, more than 1,000 cases, wanting the IT request portal, a WhatsApp widget, or custom SLA targets.
- **Standard → Enterprise:** more than 100 seats or 10 client companies, a need for custom roles or automation, connecting fulfilment to Power Automate or n8n, or a security review that asks for unlimited audit history and an uptime commitment.

NEXT STEPS

Decisions and work before launch

Decisions to make

- Confirm the price points against local markets (a local-currency price list may convert better than USD).
- Choose whether Free has a project limit or a test-case limit, or both.
- Decide whether client-company support seats are billed to you or to your customer.
- Set the dollar value of one AI credit once real token costs per feature are known.
- Check competitor prices for test management and service desk tools before publishing.

Product work needed

- A plan field on the organisation, and checks that enforce the limits above.
- Map plan features to the existing permission catalog so upgrades are switches, not new code.
- Payment provider integration (Stripe or Paystack), invoices and a billing page.
- Seat counting by role, so free requester and viewer accounts are excluded.
- A pricing section on the landing page and an in-app upgrade prompt.

This is a draft pricing model for internal discussion, not a published offer. Prices, limits and plan contents may change. Features marked "Roadmap" are not yet built.
